Diego Alvarez
Platform Engineer
Madrid, Spain

Professional Summary

Platform engineer with 6 years of experience scaling backend services, observability, and contai

Skills

Python, Docker, Kubernetes, AWS, PostgreSQL, Redis, CI/CD, FastAPI, System Design, Go

Experience

Platform Engineer | Northstar Cloud | 2022 - Present
- Reduced deployment times from 28 minutes to 9 minutes with self service CI/CD templates.
- Containerized FastAPI services for 15 teams and improved release confidence.

Backend Engineer | ScaleForge | 2020 - 2022
- Built resilient scheduling services in Python and Go backed by PostgreSQL and Redis.
- Improved API response times by 31% through indexing and caching strategies.

Projects

Ops Health Monitor (Go, Python, Docker, Grafana)
- Created reliability scorecards for engineering leaders and reduced incident MTTR.

Education

Bachelor of Science in Computer Engineering, Universidad Politecnica de Madrid
